

The only portal designed specifically for chain pharmacies

The Pharmitas Portal is a centrally hosted platform that offers timely solutions to streamline pharmacy operations and improve financial performance.

The Pharmitas Portal uses patented technology to integrate chain pharmacy resources and information in delivering portal applications that increase both productivity and profitability.

At the core of the Pharmitas Portal is a deep understanding of chain pharmacy organization and structure. This architecture enables the Pharmitas Portal to be easily and quickly deployed

in almost any enterprise environment. Highlights of this architecture include:

Messaging

- Publish and monitor consumption of critical data in real-time to all locations

Authentication

- Highly secure and customizable Identity and access management
- Optional integration into existing single sign-on (SSO) systems

Role Based Assignment and Security

- Organizations have complete control over user access to portal applications and reports

Portal applications:

ComplyScan:

- Automate PSE sales
- Compliance with all sales and reporting requirements

PharmiSage:

- Eliminate stale high-value inventory
- Improve Profitability

ChainMail:

- Send and monitor messages with chain stores and users

Compatible with:

- EnterpriseRx
- PDX
- PharmacyRx
- Pharmaserv
